VIDEO SECURITY *for* CASINOS

TOP QUALITY

Your ability to provide security depends on top quality, easy to use video recording solutions. You also need to store that video long enough to protect your organization in the event of a lawsuit. New technology allows you to store more video in less space than ever before. This can help you substantially reduce costs, while gaining capabilities.

CasinoVision, Inc.

N66 W38493 N. Wood Lake Cr., Oconomowoc, WI, 53066

BENEFITS

Lower costs

Video storage costs are one of the top expenses in casino security today. Now you can store more video—longer—at a fraction of the cost.

Keep patrons and employees more secure

Nothing ruins a casino's reputation like security problems. Monitor cash counting and gaming operations with the quality and speed you need to spot the quickest sleight of hand.

Liability protection

High quality video can be stored affordably for as long as you need to provide evidence to fight liability claims.

Loss prevention

The more security video you have, the easier it is to pinpoint trouble spots and prevent problems before they start. Don't let the high costs of traditional video options stop you from discovering the latest developments in casino security.

Security Solutions for Casinos

BENEFITS, FEATURES AND OPTIONS

Discover the benefits of high quality, low bandwidth security:

- Longer storage capacity helps protect you from liability.
- High frame rate captures every important detail.
- 24/7 continuous recording proves when events happened, or didn't happen.
- Highly compressed video won't tie up network bandwidth.
- Separate drive for operating system increases reliability and reduces system downtime.
- Video compression adjusts automatically to provide more storage in less space.
- Easy to use software allows viewing and sharing of video clips.
- Reliable, fault-tolerant design keeps video evidence secure.

Top of the line features make administration easy:

- View multiple camera outputs all on one screen.
- Digitally zoom in on a desired area during live video playback.
- Stream video and audio from remote locations.
- View real-time camera action from any Internet browser.
- Visible, ultra-secure watermarking.
- Remote network storage.
- Hot-swappable drive option.
- Up to 32 unique alarm I/O per DVR.
- Alarm Management.

CAM MP

Real-time, TV-quality recording, 15+ days of storage at 480 fps.

The Vision Controls CAM MP DVR provides TV-quality video with 15+ days of storage. Excellent for casinos that need high resolution, real-time security and surveillance. The outstanding image compression and crystal clear image capture, combined with Vision Controls' IT integration, makes this an ideal choice for casinos that demand quality without compromising network speed and storage space.

CAM MPR

Ultimate performance. 35+ days of storage, best quality, low bandwidth digital surveillance at 480 fps.

The CAM MPR surveillance DVR is for casinos that need the power of a professional-grade digital video security system. The CAM MPR provides TV-quality frame capture, long storage capability, and the peace of mind you get with RAID5 storage. This is the ultimate in quality and security, all backed by the dependability and ease of RAID5 technology.

TV-quality video capture gives you the detail you need to spot problems.
