FINANCIAL SERVICES

TOP-QUALITY VIDEO

Your ability to provide your bank with the best possible video security depends on top quality, easy to use video recording solutions. You also need to store that video long enough to protect your organization in the event of a lawsuit. New technology allows you to store more video in less space than ever before. This can help you substantially reduce costs, while gaining capabilities.

BENEFITS

Lower costs

Video storage costs are one of the top expenses in bank security today. Now you can store more video—longer—at a fraction of the cost.

Keep patrons and employees more secure

Nothing ruins a bank's reputation like security problems. Monitor ATMs, teller transactions, cash counting and operations with the quality and speed you need to spot the quickest sleight of hand.

Liability protection

High quality video can be affordably stored for as long as you need to provide evidence to fight liability claims. Continuous recording lets you prove when things happened, or didn't happen.

Loss prevention

The more security video you have, the easier it is to pinpoint trouble spots and prevent problems before they start. Don't let the high costs of traditional video options stop you from discovering the latest developments in bank security.

Security Solutions for Financial Services

BENEFITS, FEATURES AND OPTIONS

The CAM product family of security products provides high quality frame capture and industry leading storage capacity.

CAM XP

Real-time, TV-quality recording, 90 days of storage at 160 fps.

The CAM XP provides banks flexible, high-quality, low bandwidth, expandable video security and surveillance at a highly competitive price.

CAM XPR

180+ days of storage, RAID5 reliability, TV-quality recording at 160 fps.

The CAM XPR brings you the peace of mind of long term RAID5 storage in a high-quality, low bandwidth, expandable video security solution.

TV-quality video capture gives you the detail you need to spot problems.

CAM MP

Real-time, best quality recording, 15+ days of storage at 480 fps.

With CAM MP, your bank can have outstanding image compression and crystal clear image capture, making this an ideal choice for operations that demand top quality without compromising network speed and storage space.

CAM MPR

Ultimate performance. 35+ days of storage, best quality, low bandwidth digital surveillance at 480 fps.

The CAM MPR is for banks that need the power of a professional-grade digital video security system. The CAM MPR provides best quality frame capture, long storage capability, and the peace of mind of RAID5 storage. This is the ultimate in quality and security, all backed by the dependability and ease of RAID5 technology.
